**AZEROCARE USER GUIDE OF CLEANING & MAINTENANCE**

# *The purest form of technology and elegance...*

For thousands of years, used by hundreds of civilizations marble is gaining a new meaning.

With the expertise of the World's leading natural stone company Luigi Antolini Italy whose Azerocare processed natural stones provide up to 8 hours of **impermeability**.

## **UNIQUENESS OF AZEROCARE**

- Provides protection for all kinds of liquids and household acids on polished marble surfaces up to 8 hours.
- Its technology is eco-friendly.
- Azerocare is a permanent protection, no need to the further maintenance products.
- Since it is anti-bacterial no need to disinfectants.
- Has resistance to UV lights.

In order to keep the appearance of Azerocare protected natural stones in your living spaces for a long time, just pay attention to our maintenance and cleaning suggestions.

## **DAILY CLEANING**

The best way to do the daily cleaning of Azerocare protected natural stones is using a soft cloth which has no abrasive texture and lukewarm water with a liquid soap that has pH value between 3-8.

## **STUBBORN STAINS**

In case of stubborn stains such as grease stains and food residues, pour warm water onto the stain and clean with liquid soap and a soft cloth. We recommend that you clean all kinds of substances spilled on the surface as soon.

## **HEAT RESISTANCE**

Do not allow the kitchen utensils such as hot pots and pans to come into direct contact with the surface in case of damage due to sudden heat exchange of the surface.

## **BE CAREFUL ABOUT...**

- Never use sharp items such as knives directly on the surface.
- In order to prevent scratches and cracks on the surface of the kitchen tops, always use cutting boards or similar items.
- Use protective materials such as pads under the legs of tables, chairs and furnitures to prevent scratching the surface in case of motion.
- Do not expose the surface to high temperatures, always use trivets or similar items.
- Never use abrasive products such as hard steel wools, rough textured clothes or sponges, always prefer soft textured products.
- Never try to polish the surface.
- Clean the spills quickly.
- Do not use these products or products that contain them:
  - Bleach
  - Trichloroethylene
  - Industrial Solvents
  - Paint Solvents
  - Hydrofluoric Acid
  - Dichloromethane (Methylene Chloride)
  - Sodium Hydroxide
  - Thinners and other chemicals, acetone
  - All products with acidic components below pH 3 or basic component higher than pH 8.

The product has been successfully tested against the elements listed below, according to the EN 16301: 2013 Standard (Natural stone test method – Determination of sensitivity to accidental staining) for 8 - 12 Hours, depending on the composition of the material.

Red Wine

Coffee

Carbonated Drinks

Extra Virgin Olive Oil

Vinegar

Ketchup

Lemon

Mustard
